Summary

Talented computer science college student looking for opportunities to continue to gain experience and acquire new skills. Experienced in software development and system administration, especially in a fast-paced startup environment. Excellent communication skills, team work, and project management.

Technical Skills

- Fluent in PHP, SQL, HTML, Java, JavaScript, CSS, Bash
- Experience with MySQL and phpMyAdmin
- Expert in email, web, VPN, storage server management
- Strong communication and collaboration skills
- Extensive experience with Linux and FreeBSD
- Experienced in Agile/Scrum methodology

Education

Stevens Institute of Technology, Hoboken, NJ

- Expected to graduate May 2021
- GPA: 4.00 (Computer Science Major)

Regis High School, New York, NY

Experience

Technology and Inventory Manager, Meals with a Mission

June 2017 – Present

- Assist with the day to day operations of this small non-profit agency that provides meals to the hungry in New Jersey in a part time position. Work to update the technology workflow as well as manage input and output. Complete any task necessary to ensure smooth operation of the agency.

Consultant and Summer Intern, Source3

June 2015 – September 2015

- Served as a summer intern at a 3D printing company responsible for researching tech related decisions, as well as building prototypes of products in development. Operated two 3D printers. Later hired to build a derivative rights platform where content owners and creators collaborate to license copyrighted 3D content.

Summer Intern, Grand Central Tech Startup Accelerator

June 2015 – August 2015

- Recruited to build a prototype startup under the guidance of Google, Microsoft, and General Assembly with assistance from startup companies and employees of the accelerator. Interned with Source3, a company in the program.

Captain, CyberPatriot Team, Regis High School

September 2014 – June 2017

- Led the team to win first place in NY State and fourth place in the Northeast in the school's best-ever showing. The cyber defense competition puts teams of high school students in the position of newly hired IT professionals tasked with finding cybersecurity vulnerabilities and hardening the system while maintaining critical services.
- Prepared in advance and planned strategy. Identified teammates' strengths and weaknesses, assigned teammates to tasks based on their knowledge and skill sets, supervised/assisted teammates, coordinated with school faculty.

App Developer in residence, Pace University

July 2013 – August 2013

- Chosen as one of only 24 students from New York City to participate in STEM Camp at Pace University to research and create learning apps for educationally disadvantaged students.
- Created a website for a virtual chemistry lab, so that teachers and students without access to laboratory resources could utilize the website to perform experiments and see, hear, and analyze the results, as if they were physically present.
- Utilized assistance from Pace graduate/undergraduate students as well as visits to startup tech and design companies.

Bookstore Staff, Regis High School

June 2014 – June 2015

- Processed and packed book orders for the upcoming school year. Handled subsequent orders in the book store after school.

Owner/Administrator, South Bergen Weather Website (201weather.com)

April 2012 - Present

- Created and maintain a weather website using a comprehensive personal weather station at my home.
- Created new code and modified preexisting code to show live weather data and other supplemental information, providing comprehensive weather conditions and forecasts and operating my own custom email server for notifications.
- Built and maintain a custom text-message weather alert system, in addition to a continuous video feed.
